

San Joaquin General Hospital is recruiting for SENIOR NURSE PRACTITIONER –INPATIENT ORTHOPEDICS

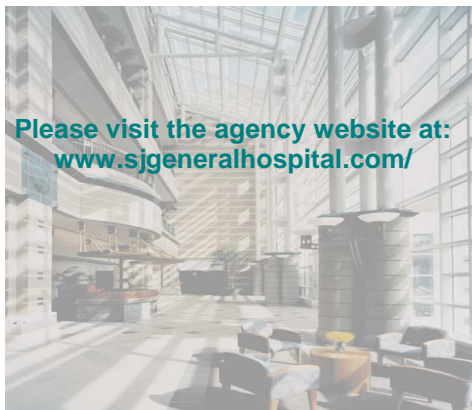

THE POSITION

San Joaquin General Hospital is seeking a dynamic experienced Senior Nurse Practitioner to join the hospital's Orthopedic Practice. This Allied Health Professional functions relatively independently as part of a orthopedics medical team.

Ideal candidates will possess direct orthopedic clinical nursing experience providing Allied Health primary medical service, performing physical examinations and responsibility over clinical management of orthopedic cases within the scope of their competence following standardized procedures and coordinating the care given by other medical specialists, sub-professional staff and non-county agencies. This position will also assist with inpatient Orthopedic Cases.

San Joaquin General is a community hospital and designated Trauma Facility with over 1500 employees who are dedicated to a philosophy of excellence in providing health services, education and professional training in an integrated system that values quality of life, family interaction, and respect for both clients and employees.

The agency is committed to the delivery of community orientated, culturally sensitive, and affordable health care throughout San Joaquin County.

TYPICAL DUTIES

- Elicits, records, and/or reviews medical histories and performs acute primary care pre-employment, annual, periodic, and various other routine physical examinations on patients ranging from newborn through geriatric, utilizing the problem-oriented medical record or other appropriate systems; provides general and specific health and medical instruction to patients, clients and families.
- Coordinates individual and family health management, utilizing physician resources or community agencies; provides guidance instruction, treatment and referrals as appropriate.
- Performs early diagnostic examinations; may order laboratory tests, x-rays, electrocardiograms and other diagnostic tests; may collect specimens for, perform, and interpret selected laboratory tests and take action on abnormal as necessary; provides immunization and gives injections.
- Identifies basic complex medical conditions; determines if patient's medical, surgical, and psychiatric problems require immediate consultation with the physician; treats conditions and manages stable phases of chronic illnesses on consultation with or following specific protocols established by physicians, including dispensing and/or administering medication when indicated; alerts appropriate medical personnel and/or agencies of potential community health problems as encountered.
- Observes and evaluates emotional condition of patient; counsels and supports patients in the area of psychosocial problems and inter-relationships; provides emergency treatment or referral for patients with severe emotional upsets.
- May work in hospital and outpatient; may lead ancillary clinic staff; may orient and oversee nursing students, medical students and other providers.
- Provides for Quality Assurance through review and audit of clinic charts to assure adequate medical management and follow-up; provides consultation to other providers.
- Keeps records and completes forms and questionnaires as required. Attends meetings and workshops; serves on committees as assigned; provides consultation and assistance in areas of specialty.
